2019-2020 Launch Checklist

You're just a few steps away from starting your Girls Who Code College Loop and creating an on-campus community of allies who are passionate about problem-solving, social change, and computing. Follow these steps to get started!

- ☐ **Join HQ**
Girls Who Code HQ is your College Loop's one-stop shop for everything you'll need throughout the year. An email invitation with the login information should have been sent from hq@girlswhocode.com. Email collegeloops@girlswhocode.com if you are unable to access the platform.
- ☐ **Find a Space**
Confirm the space where you'll host your meetings, such as a classroom, rec room, or computer lab. Make sure to pick a space with wifi and outlets.
- ☐ **Recruit Members**
Spread the word about your College Loop: use the [recruitment flyer](#) to contact alumni on campus, and invite your female-identifying and non-binary classmates. When your College Loop is ready to go, invite members to join directly from your HQ home screen!
- ☐ **Establish Your College Loop on Campus**
Establishing your College Loop as an on-campus club/org will allow you to more actively recruit members, reserve space, receive a faculty advisor, and even potentially receive funding. Learn [more](#).
- ☐ **Prepare**
Each challenge requires slightly different preparation and materials. Using the planning card, read the challenge directions. Next, familiarize yourself with the main event, preview the go beyond prompts, and make adjustments to the plan as needed.

More questions? Check out our [FAQ](#) and if you can't find the information you're looking for, you can always email us at collegeloops@girlswhocode.com.

**Passionate about social change & computing?
Participated in Girls Who Code in the past?**

Meet other women on campus interested in computer science!

Attend skill & career-oriented workshops
Compete with coding challenges
